# WHAT IS FIBERGLASS ?

Fiberglass, as the name suggests, is glass that has been spun into very fine fibers and mixed with a specific resin to give it resounding structural strength. It is a favorite of many industries due to its unique combination of strong characteristics.

## How it is produced ?

Made out of Crushed Scrap Glass and Silica ,heated together at an extreme high temperature gives you this eco – friendly Raw Material known as **Fiber Glass**.

## Characteristics:

- Corrosion Resistant
- Heat Resistant
- Ozone Resistant
- Weight to Strength Ratio
- Economical
- Flexible
- All Weather Proof
